

Cylinder – Linear Filling Stations

Description:

Linear, wall or floor mounted cylinder filling racks complete with Integrated high pressure hoses & cylinder connectors and individual hose isolation valves.

Features / Specification:

- Inert, Flammable and O2 variants
- 420 Bar design
- 420 bar adiabatic shock tested hoses, cylinder connectors and hose isolation valves
- Hoses complete with anti-whip cables, bend restrictors and integral heatsink (for O2 applications)
- Integrated;
 - Cylinder restraints (chains / straps)
 - Moveable cylinder “shelf” allowing multi size cylinders to be filled
 - Bundle / Pack filling connections
 - Magnetic or infra-red cylinder temperature probe(s)
- Multi position (number of cylinders filled per time)

Options:

- Wall mounted.
- Floor stand
- Multi choice cylinder connectors;
 - Straight
 - 90 degree single axis swivel
 - 90 degree dual axis swivel
